SUMMARY

AI and software engineer with internship and research experience in AI/ML, software development and intelligent automation. Experienced in building AI-powered applications, automation workflows and API-integrated software solutions, with a focus on developing practical and scalable technologies.

EDUCATION

Bachelor of Science in Computer Science | 3.71/4.0 GPA ***May 2027 | Tempe, AZ***
Arizona State University – Ira. A. Fulton Schools of Engineering

- **Awards/Honors:** Dean's Honor List, New American University Scholar, Experiential Learning Grant (2024 and 2026), Society of Women Engineers Distinguished Member (2026)

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL, HTML, CSS
AI/ML & APIs: Large Language Models, Prompt Engineering, AI Agents, OpenAI API, OpenRouter API, Scikit-learn
Frameworks & Tools: AWS, Node.js, Git, GitHub, React, PostgreSQL, Firebase
Design, Media & Productivity: Adobe Creative Suite, Canva, Microsoft 365, Google Workspace

EXPERIENCE

Software Engineering Capstone | *Selfmadee LLC (Industry-Sponsored Project)* ***August 2026 – Present | Tempe, AZ***

- Collaborate with an engineering team on an **AI-powered e-commerce platform** to streamline Shopify order fulfillment and warehouse operations.
- Define and implement functional requirements for **product data display**, including product names, SKUs and required quantities within the fulfillment pick-list workflow.
- Deliver tested features through **Agile sprints**, managing work in **Taiga** and using GitHub branches, pull requests, automated CI and stakeholder review.

AI Software Development Intern | *Pantech Solutions Pvt. Ltd.* ***August 2026 – Present | Remote***

- Build and deploy **AI-powered applications** focused on workflow automation, computer vision and business process optimization.
- Integrate **APIs, webhooks** and **automation workflows** to enable communication and data exchange across software services.
- Collaborate with industry mentors to **implement, test** and **validate** software solutions against functional requirements.

Campus Ambassador | *Adobe* ***February 2025 – Present | Remote***

- Execute data-driven outreach campaigns through **5+ events** per semester and digital promotions, engaging **200+ students** with Adobe Creative Cloud tools and resources.
- Collaborate with **5+ student organizations** to manage event registrations, deliver product demonstrations, and expand awareness of Adobe program across the campus.

Research Intern | *Fulton Undergraduate Research Initiative (FURI), ASU* ***January 2025 – November 2025 | Tempe, AZ***

- Investigated **agentic AI approaches** for pediatric seizure onset zone detection, exploring **LLM-based reasoning** and available clinical knowledge.
- Researched **LLM-based** daily planning systems using Python, prompt engineering and **API integration** to explore personalized, context-aware recommendations.
- Conducted research under **Dr. Sandeep K. S. Gupta, Director of ASU's Impact Lab** and presented findings at **2 Fulton Forge Student Research Expos**.

PERSONAL PROJECTS

EventSphere ***(Ongoing)***

- Architect and develop a **full-stack** event management platform with secure authentication, **role-based access control** and event registration.
- Design **backend services** and **database operations** to support efficient event registration and data management.
- Implement **automated testing** and **deployment workflows** to support application reliability and maintainability.

Fake or Nah?

- Built a **machine learning model** to **detect misinformation** using TF-IDF features, sentiment analysis and linguistic pattern extraction from news articles.
- Performed **statistical analysis** on fake and real news datasets to identify distinguishing textual characteristics and **improve feature selection.**
- Improved model accuracy and interpretability using a hybrid machine learning approach, **achieving ~98% classification accuracy.**

CommitLens

- Developed an **AI-powered Gmail add-on** that extracts commitments from emails and automatically organizes them into actionable tasks with associated deadlines.
- Integrated **Gmail** and **Google Calendar APIs** to automate event creation, commitment tracking and cross-platform task management.
- Built a real-time dashboard with **AI-generated email response suggestions** and proactive notifications, improving visibility into pending commitments and follow-ups.

CERTIFICATIONS & AWARDS

Society of Women Engineers (SWE) at Arizona State University

- Recognized as a **Distinguished Member** for active involvement and engagement within the organization.
- Member of the **SWE Annual WE Conference Committee,** supporting conference planning and professional development initiatives.

AI4ALL Ignite Program ***August 2025 – March 2026 | Remote***

- Selected for a competitive **AI and career readiness program,** collaborating with industry mentors on real-world projects and developing leadership, teamwork, and responsible AI practices.

Research Paper Publication: Eco-Garbage Management System ***August 2022***

- **First Author** - *International Journal of New Innovations in Engineering and Technology (Volume 20 Issue 2)*

AWS Academy Credentials

- AWS Academy Graduate - Cloud Operations (2024)
- AWS Academy Graduate - Cloud Foundations (2025)
